PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and delivering applications through both independent projects and collaborative team environments. Combines a strong learn-by-building mindset with an appreciation for software engineering fundamentals, enabling the rapid adoption of new technologies while maintaining focus on scalability, maintainability, and user needs. Passionate about solving real-world problems and building reliable, impactful software that creates meaningful value.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, Python, SQL, C
- **Web Technologies & Frameworks:** Angular, React, Next.js, Vue.js, Tailwind CSS, Express.js, FastAPI, Spring Boot
- **Databases & Tools:** MySQL, MongoDB, PostgreSQL, Redis, Git, Docker
- **AI & Agentic Workflows:** LangGraph, LangSmith, LangChain, Retrieval-Augmented Generation (RAG), Multi-Agent Systems
- **Software Engineering Practices:** Data Structures & Algorithms (DSA), Software Development Life Cycle (SDLC), Agile/Scrum, RESTful APIs, API Integration

EXPERIENCE

- **EPAM Systems**
Junior Software Engineer Intern (A1) *Dec 2025 – May 2026*
 - Strengthened software engineering fundamentals through hands-on development using **JavaScript**, **TypeScript**, **Angular**, **Node.js**, and **Git**, while working within Agile development practices.
 - Collaborated within a **cross-functional Scrum team** to deliver an eCommerce application, contributing to feature development using **Angular**, **Node.js**, **Express.js**, and **MongoDB** while following GitHub Flow and Agile ceremonies.
 - Built a scalable product catalog architecture using **Payload CMS** with dynamic category hierarchies, and enhanced the application through features such as **real-time currency conversion** and responsive user interfaces.
- **Realfy Oasis**
Node.js Developer Intern *Aug 2024 – Oct 2024*
 - Developed backend services using **Node.js**, **Express.js**, **Firebase**, and **Directus CMS**, implementing **JWT-based authentication** and supporting core application functionality.
 - Integrated the **OpenAI API** to enable AI-driven fitness experiences, generating personalized workout and diet recommendations based on user inputs.
 - Containerized and deployed application components using **Docker** on **DigitalOcean**, collaborating closely with designers and developers in an Agile startup environment.

PROJECTS

- **RAG-based WhatsApp Chatbot for Community Platform**
LangGraph, LangSmith, FastAPI, Docker, WhatsApp Integration, Multi-Agent System *Aug 2025 – Sep 2025*
 - Designed a **multi-agent retrieval-augmented chatbot** using LangGraph to intelligently route complex user queries across specific domains, enabling context-aware interactions through **rolling conversation summaries**.
 - Developed a low-latency conversational pipeline integrating **Qdrant vector search** for semantic retrieval, **LangSmith** for performance tracing, and multi-turn state management to orchestrate accurate response generation.
- **MusiBuzz Music Streaming & Recommendation Platform**
Python, Django, Vue.js, Tailwind CSS, RESTful APIs, Spotify API, Collaborative Filtering *Nov 2023 – Feb 2024*
 - Developed a full-stack music discovery application featuring a highly responsive, utility-styled user interface alongside a robust backend framework optimized to deliver real-time external database search queries.
 - Engineered a custom **collaborative filtering-based recommendation feature** that analyzed user behavior vectors to identify shared listening patterns and dynamically serve tailored track suggestions.
- **ShareWithMe - Anonymous File Sharing Platform**
React, MongoDB, Express.js, Git, Firebase, RESTful APIs *Jul 2023 – Oct 2023*
 - Engineered an authentication-free file-sharing architecture, integrating a Node.js/Express.js backend with Firebase Storage for secure multi-format file uploads and high-availability cloud object recovery.
 - Implemented secure, password-protected file sharing along with unique, memorable file identifiers to streamline end-to-end data retrieval workflows without compromising user anonymity or platform privacy.

EDUCATION

- **KL University**
B.Tech in Computer Science; 9.5 / 10 *Aug 2022 – Apr 2026*
